Rooster Petroleum Passes BOEMRE Annual Inspection

On July 9th, the Bureau of Ocean Energy Management, Regulation and Enforcement (BOEMRE formerly MMS) completed its 2010 Annual Audit Inspection at Rooster Petroleum's Vermilion 376 Production Platform.

We are very proud to announce that Rooster received a "ZERO INC" inspection which means we were 100% in compliance with all of BOEMRE's Safety Regulations & Guidelines.

During this two day audit, BOEMRE performed a detailed inspection of Rooster's facility which included the testing of all safety systems, water sampling documentation, frequency of crane operations / inspections and a detailed review of all required documentation for accuracy and compliance.

We would like to congratulate the following operators on a "ZERO INC" Annual BOEMRE Inspection:

Larry Sanders
Henry Oubre
Mark Walters
Curtis Babineaux

Brent Fontenot
Matt Cain
Steve Orgeron
Tommy Thibodeaux

Vermilion 376 Production Facility

*We are pleased to have operators who do the right things for the right reasons
by demonstrating strong leadership on the job.*
