CMC Receives Recognition on a Job Well Done

To all (Project Management, Engineering, Operations, Prime Contractor, Sub Contractors and Inspection Staff):

It has been my pleasure to work with people who continued to stay focused on a major project. Looking back a few months ago—I feel very fortunate in having the opportunity of meeting/working with groups/individuals while brainstorming/interfacing resolve of Project Challenges and with success as our end result.

Simply...Job well done and Thanks to everyone.

Thanks,  
Mike McClain  
Construction Mgr.  
Enbridge Energy Company, Inc.

**attaboy** To the Inshore Department on the successful completion of the Slug Catcher Expansion Design Project for Enbridge.

Tim Rogers, CMC Diver  
“The people offshore are different. We come from everywhere; we have different backgrounds; we like different things. But at the end of the day, these are the friends you make for a lifetime. These are the people you trust with your life.”

Combining his professional background as a welder and his passion for scuba diving, Tim decided to combine both interests and jumpstart his career an underwater welder. In 1999, he entered the field after graduating from The Ocean Corporation. An employee with CMC since 2004, he has worked as a diver and sat diver and has recorded over 900 days in SAT. He believes he has the “dream job” and wants to be a part of diving for as long as he can.
